Dear Parents / Carers,

As part of our ongoing development of times tables, we have restructured the way we teach and test them across years 2, 3, and 4. So that children can hopefully embed the learning and deepen their understanding of them ready for their Multiplication check at the end of Year 4.

This means that your child will only work on one times table per half term as the Class focus- but if your child has “mastered” this one then please feel free to practise and recite others with them- using games, rhymes, TTRockstars etc.

The idea of this focus is so that children do not become overwhelmed with too many facts and can really begin to remember and use each times table more confidently as they move through school.

The order they will be taught this year is set out below:

Year 2: x10, x5, x2 Then time to recap and revise

Year 3: x3, x6, x4, x8

Year 4: x12, x9, x7, x11

Thank you for all your support and please contact me if you have any questions

Mrs Mayston (Maths lead KS2)
